Terraform Plan with -target

```
# List Resources from state
terraform state list

terraform plan -target=azurerm_virtual_network.myvnet-new

Observation:
1) Message: "Plan: 0 to add, 1 to change, 0 to destroy"
2) It is updating Change-1 because we are targeting that resource
"aws_instance.my-ec2-vm-new"
3) It is not touching the new resource which are creating now
"azurerm_virtual_network.myvent9".
It will be in terraform configuration but not getting provisioned when
we are using -target

# Terraform Apply
terraform apply -target=azurerm_virtual_network.myvnet-new
```
